Environmental Policy 2026

Bangchan General Assembly Co., Ltd. recognizes the importance of conducting business in parallel with environmental protection and the efficient use of resources to minimize environmental impacts in all aspects and support long-term sustainability. Therefore, the Company has established the following policies and practices:

1. Compliance with Environmental Laws and Requirements.

- The Company shall strictly comply with all applicable environmental laws, regulations, standards, and relevant international requirements.

2. Climate Change, Energy Management, and Emissions Reduction.

- The Company is committed to continuously monitoring and reducing greenhouse gas (GHG) emissions from its operations.
- The Company places importance on climate change management by developing and reporting the Carbon Footprint of Organization (CFO) and striving toward Net Zero Carbon emissions.
- The Company will promote and consider the use of clean energy and renewable energy in both production processes and office operations.
- The Company shall control and manage noise emissions from operations in compliance with applicable standards to prevent impacts on employees and surrounding communities.

3. Resource and Waste Management Based on Circular Economy Principles.

- The Company is committed to reducing waste generation by actively applying the 3Rs principle (Reduce, Reuse, Recycle).
- The Company will utilize production technologies and resources efficiently to achieve maximum productivity and product quality, while minimizing environmental impact.

- The Company aims to reduce environmental impacts from procurement by supporting suppliers with environmental policies and environmentally friendly products (Green Procurement).

4. Ecosystem and Natural Resource Protection (Ecosystem & Biodiversity).

- The Company promotes sustainable land use (biodiversity, land use, and deforestation) and avoids activities that may impact ecosystems and biodiversity, with no involvement in deforestation.
- The Company implements measures to prevent chemical contamination of soil and maintains soil quality within acceptable standards.
- The Company is committed to conducting business ethically and avoiding the use of materials or processes involving animal cruelty in all forms (Animal Welfare).

5. Promotion, Support, and Awareness Building.

- The Company provides regular environmental training and awareness programs for employees at all levels and contractors to instill environmental responsibility.

6. Transparency, Disclosure, and Monitoring.

- The Company recognizes the importance of communication with local communities and actively cooperates in environmental protection activities.
- The Company shall continuously and transparently evaluate its environmental performance.

Environmental Targets for 2026

No.	KPI	Target
1	Reduce electricity consumption by at least 5% (compared to Aug-Dec 2025)	555,370Kwh
2	Reduce gas consumption by at least 5% (compared to Aug-Dec 2025)	974 MMBTU
3	Reduce water consumption by at least 5% (compared to Aug-Dec 2025)	4,493m ³
4	Zero major non-conformities from external audits	100%
5	Compliance with all relevant company laws and regulations	100%
6	Factory environmental emissions measurements comply with the law	100%
7	Treated wastewater quality measurements comply with the law	100%
8	Reduce waste sent to landfill by at least 2% from 2025	60,927Kgs
9	Zero external environmental complaints	0
10	Complete Carbon Footprint data (Scope 1, Scope 2)	100%

This announcement is effective on April 30, 2026

Mr. Vunchai Jungsanguanpornasuk

President & CEO
